AMARJIT SINGH SODHI

Immediate Joiner | Team Lead | Senior Android & Flutter Developer

+91 88725 19493 • jeetviz90@gmail.com • Mohali, Punjab, India • LinkedIn • Portfolio

PROFESSIONAL SUMMARY

- **5+ years** of experience building customer-facing Android and Flutter applications using **Kotlin**, **Flutter**, and **Dart**. Promoted to **Team Lead** after consistently delivering high-impact solutions, demonstrating strong technical ownership, leadership, and execution.
- Extensive experience architecting scalable mobile applications across **Digital Signage**, **Logistics**, **Enterprise Mobility**, **AI**, **AR**, and **NFC** domains. Successfully delivered products across India, Nigeria, Ghana, USA, Canada, UK, and China.
- Supported a platform with **500K+ installs**, reduced production crashes by **20–35%**, optimized application size by **5–8%**, improved user retention, and built business-oriented solutions deployed across **1,000+ Android TV screens**.
- Led cross-functional engineering initiatives, mentored **3–5 junior engineers**, conducted code reviews, collaborated with cross-regional teams, and delivered production-ready applications using **Clean Architecture**, **MVVM**, **Coroutines**, **Hilt**, **Media3**, **MQTT**, **AI**, and **ARCore**.

TECHNICAL SKILLS

Languages & Frameworks	Kotlin, Java, Dart, Android SDK, Flutter, Jetpack Components, Jetpack Compose
Architecture, Libraries & Platforms	Clean Architecture, MVVM, Repository Pattern, SDLC, AI-Driven Development, Coroutines, Flow, Hilt, Room, Media3 ExoPlayer, Retrofit, OkHttp, Firebase, MQTT, LiveKit, Android TV, Camera2, Digital Signage, AI Integration, ARCore, NFC, REST APIs, JSON, Firebase Crashlytics, Gradle, SOLID Principles, ViewModel, Dependency Injection, DataStore
Tools & Distribution	Android Studio, VS Code, Git, GitHub, Jira, Postman, Claude, Google Gemini, Google Cloud Console, Google Play Console, App Store Connect
Human Languages	English, Hindi, Punjabi

TOP PROJECTS

SpotX

- **Tech:** Kotlin, Media3, MQTT, Camera2, Google ML Kit, AI, LiveKit, Room, Android Package Installer API
- Led Android development of a **large-scale** Digital Signage platform deployed across **1,000+ Android TV screens** for Homeland customers spanning Mohali, Chandigarh, Delhi, Mumbai, and other major Indian cities.
- Delivered **mission-critical features** including AI-powered audience demographics using Google ML Kit, Screen Mirroring, MQTT-based real-time communication, remote device management, and media scheduling.

- Solved complex chipset-specific media playback challenges across Android TV hardware through decoder optimization and resource management, reducing **memory consumption**, improving **application launch time**, and enhancing application stability and playback reliability.

GIGGO

- **Tech:** Kotlin, REST APIs, Firebase, Payment Gateway, QR Scanner, Maps
- Modernized an **enterprise** logistics platform serving customers across Nigeria, Ghana, United States, Canada, United Kingdom, and China.
- Played a key role in modernizing a **500K+ install** logistics platform, improving application stability, user experience, and long-term maintainability.
- Reduced production crashes by **20%** through performance optimization, architectural improvements, and proactive issue resolution.

Remotely

- **Tech:** Kotlin, ARCore, Camera2, Accelerometer and Magnetometer Sensor APIs, Complex UI design with RecyclerView
- Developed an utility application in collaboration with Clearly Energy to streamline residential energy assessment workflows across the United States.
- Built an intuitive Augmented Reality-based area measurement feature using ARCore, **significantly simplifying** property measurement and report preparation.
- Led research and implementation of ARCore, sensor fusion, and 3D visualization to deliver an **accurate**, production-ready solution.

GetWetap – NFC Business Card

- **Tech:** Flutter, Firebase, NFC, QRCode, Google Deep Linking, Google APIs, Advanced WebView
- Built a cross-platform Flutter application enabling secure digital identity and NFC-based smart business card sharing.
- **Reduced production crashes by 15%** and optimized application size by 5-8%, improving stability, installation efficiency, and overall user experience.

PROFESSIONAL EXPERIENCE

Codknox Software Solutions Pvt. Ltd.

Jul 2024 — Jul 2026

Team Lead | Senior Android & Flutter Developer

Mohali, Punjab

- Promoted to Team Lead after consistently delivering high-impact applications, demonstrating strong ownership, technical leadership, and commitment.
- Led Android and Flutter development for production-grade applications, driving architectural decisions while remaining hands-on with feature development, debugging, code reviews, and production releases.
- Delivered Digital Signage, AI, Android TV, MQTT, Camera2, and LiveKit solutions supporting 1,000+ deployed screens across India.
- Collaborated closely with cross-functional and cross-regional teams including product managers, QA engineers, designers, and international stakeholders to deliver high-quality solutions on schedule.

- Solved complex Android platform challenges involving media playback, hardware compatibility, offline synchronization, and device management.

Zimble Code Software Solutions Pvt. Ltd.

Jul 2022 — Jun 2024

Senior Android & Flutter Developer

Mohali, Punjab

- Developed large-scale Android and Flutter applications for international clients across mobility, digital identity, and NFC domains.
- Integrated payment gateways, Firebase, QR scanning, maps, location services, and numerous REST APIs to deliver secure and scalable mobile experiences.
- Improved maintainability through Clean Architecture, MVVM, and modern Android development practices while collaborating with distributed engineering teams.

Zero2unicorn Labs Pvt. Ltd.

Oct 2019 — Jun 2022

Android & Flutter Developer

Mohali, Punjab

- Developed Android and Flutter applications for startup clients across multiple business domains, delivering scalable mobile solutions from concept through production.
- Built maintainable mobile applications using Kotlin, Java, Flutter, and Dart with integrations for Firebase, REST APIs, payment gateways, and third-party SDKs.
- Collaborated directly with founders, designers, QA engineers, and clients in fast-paced startup environments to rapidly deliver high-quality mobile products.

EDUCATION

Bachelor of Engineering in Computer Science, Chandigarh University, Punjab (GPA: 7.6)

2015 — 2019

Gharuan, Punjab

- Won 2nd Prize for the Working Model of Utopia City project at the Tech Fest.
- Actively participated as the event coordinator in college events.
