

AMARJIT SINGH SODHI

Team Lead | Senior Android & Flutter Developer

Kharar, Punjab | jeetviz90@gmail.com | +91 88725 19493 | [LinkedIn](#) | [Medium](#)

PROFESSIONAL SUMMARY

- Senior Android & Flutter Developer with 5+ years of experience designing, developing, and delivering scalable native Android and cross-platform mobile applications using Kotlin, Java, Flutter, and Dart.
- Hands-on expertise in Android SDK, MVVM, Clean Architecture, REST APIs, Firebase, Room, Coroutines, Flow, Dagger Hilt, Retrofit, Camera2 API, Android TV, MQTT, NFC, ARCore, and AI-powered mobile solutions.
- Currently serving as Team Lead, leading technical design, mentoring developers, collaborating with international clients, conducting technical R&D, and delivering production-ready mobile applications from concept to release.
- Passionate about building maintainable, high-performance mobile applications with scalable architecture, clean code practices, and exceptional user experience.

WORK EXPERIENCE

Codknox Software Solutions Pvt Ltd

Jul 2024 - Present | Mohali, Punjab

Team Lead | Senior Android and Flutter Developer

- Promoted from Android Developer to Team Lead through consistent technical excellence, leadership, and successful project delivery.
- Led the design, development, and delivery of Android and Flutter applications from concept to production deployment.
- Mentored interns and junior developers through code reviews, architecture discussions, debugging sessions, and technical guidance.
- Delivered innovative mobile solutions involving ARCore, AI, Android TV, Digital Signage, NFC and Face Recognition.
- Collaborated directly with international clients to transform business requirements into scalable, production-ready mobile applications.

**Zimble Code Software
Solutions Private
Limited**

Jul 2022 - Jun 2024 |
Mohali, Punjab

Senior Android and Flutter Developer

- Built numerous native Android and cross-platform Flutter apps from the ground up, integrating RESTful APIs to ensure seamless data synchronization and functionality.
- Implemented MVVM architectural design, establishing clear separation of concerns and enhancing code maintainability.
- Delivered projects supporting both Android and iOS devices with clean, scalable code.
- Mentored interns, many of whom successfully transitioned to full-time roles.
- Implemented comprehensive unit testing suites and executed performance optimization techniques to enhance app responsiveness and stability across diverse mobile environments.

**Zero2unicorn Labs Pvt
Ltd**

Nov 2021 - Jun 2022 |
Mohali, Punjab

Senior Android And Flutter Developer

- Promoted to Senior Android and Flutter Developer.
- Actively participated in the project planning in the pre-development phase.
- Delivered good quality products.

**Zero2unicorn Labs Pvt
Ltd**

Oct 2019 - Oct 2021 |
Mohali, Punjab

Android Developer

- Built numerous native Android apps from scratch (MVC & MVP Architecture).
- Polished my UI Development skills working on various mock-ups on personal level.

EDUCATION

Chandigarh University Computer Science (B.Tech/B.E.)

Aug 2019
Scored: 7.5

PROJECTS

Remotely

05/2025 – 12/2025

- Built a ARCore AR measurement utility for Energy Estimator, improving measurement accuracy and usability over manual methods.
- Led end-to-end R&D as sole developer on ARCore, 3D modeling, and Android Sensor APIs for real-time plane detection and measurement rendering.
- Delivered a robust, production-ready AR solution using sensor fusion (ARCore + Accelerometer + Magnetometer) to streamline home energy estimation.

SpotX

02/2026 – Present

- Led mobile app development for a modern digital signage solution deployed on Android Boxes (Droidlogic, Synovo) and Android TVs, ensuring broad device compatibility.
- Resolved critical video playback issues (lag, unsupported decoders) across diverse Android OS devices through extensive R&D on hardware-specific decoders and Media3 Exo-player optimization.
- Integrated ML-based face recognition via Camera2 API and AI models to compute real-time audience analytics (age, gender, dwell time), enabling data-driven content optimization.
- Architected the app using Kotlin, Dagger Hilt, Coroutines/Flow, Room, MQTT, and LiveKit, delivering a robust signage application capable of running across virtually all Android-powered kiosk devices.

GetWetap - NFC Business Card

07/2025 – 12/2023

- Led end-to-end mobile app development as lead developer for an NFC-based smart business card platform enabling contactless sharing via tap (NFC) or scan (QR code).
- Resolved a critical conflict between NFC Broadcast Receiver and Google Digital Asset Link through deep R&D, ensuring seamless tap-to-share functionality across Android devices.
- Built the app using Flutter, Dart, RxDart, Firebase, and Google APIs, integrating social login, QR code generation, and secure digital profile sharing.

GIGGO

05/2025 – 03/2026

- Led end-to-end Android development as Project Lead for a cross-border logistics shipment platform serving operations across Nigeria, Ghana, US, Canada, and China.
- Spearheaded a complete app revamp and database migration, ensuring zero downtime and seamless transition for users across multiple regions.
- Built the app using Kotlin, Retrofit, Firebase, and PayStack SDK, integrating QR code scanning for streamlined shipment tracking and payments.
- Engaged directly with cross-regional clients via Microsoft Teams to gather requirements, demo features, and align the logistics platform with business needs across Nigeria, Ghana, US, Canada, and China.

Furtrieve Community

09/2025 – 01/2026

- Led development of Furtrieve Community, a social platform designed to connect pet lovers with like-minded individuals, groups, and events in their area.
- Led the development team working on night shift, demonstrating strong communication and time management skills to drive project success.
